Prototype created using - Figma

Canvas Size: W390 x H884 px (iphone 13/14 size)

Photography Style: Dark Mode Cyber-Editorial

Corner Rounding throughout - 51

Glass effect on boxes:

- Refraction - 94
- Depth - 41
- Dispersion - 40
- Frost - 23
- Splay - 17

Will be created into a mobile app using flutter and dart

This is a note taking app that essentially specialized and decided to only be used for venting and “taking it to petty univeristy)

This application on opening means business and you first action is to make an entry.

This app would essentially be classified as a “mental health” app.

Basically it allows you to have a space to vent - as well as you’re prompted and encouraged to understand why you are upset and what needs of yours have not been met.

You cannot title these yourself and all titles will be a ##CASE00? because this is not for you to constantly go back and live those moments again. But you are prompted to go back to open cases and do the reflection.

The mindfulness has been added because taking a moment to destress or sit with your feelings without distraction is very healthy.

Home Screen

First page you get when you open.

You can do 2 things:

- Suitcase at the top left will take you to the cases page (case saved ad case.png)
- “TAKE IT TO PETTY UNIVERSITY” - This is a button and will take you to the add entry screen.

Wallpaper name - pettyUniversity001

cases.png

Lets dive in, unpack the mess, get grounded,
and mind our business.

##CASE001 - open

Cases will be written out over here in this slot - lets keep this
section with the font Space Mono and keep the font size to
10.

Add-Entry-Screen (open)

This page has static text at the top left (Basically describing what this page is being used for.

Each time you make an entry, it will be called ##CASE00? - Depending on what number you're on, this will use enum logic. open will be the default afterwards. Once unpacking is captured it will change to closed.

The 3 lines (saved as menu.png) to the side of that will open a drop down that asks the user if they would like to "save" or "exit" or "discard"
save takes you through the unpack model prompts
exit takes you to the cases page and saves what you currently have and case will be open by default.
discard will take you to the cases page and no data from this page will be saved.

Below is were users will be able to add their entries

user input -

Type: Space Grotesk Regular
Size: 10

menu.png

Add-Entry-Screen (closed)

From the cases page, if you select an entry that is closed - You will get a read only view - Which will have what the user entered, as well as captured all the information for the unpack-model page.

The exit at the top just takes you back to the cases page

exit-button.png

Unpack Model - (first)

After saving an entry you are directed to this page.
You are then asked if you want to upack - then you are moved to a page where you are prompted to say what you are really needing.

If you select "Later" - The case will still be open and then you will be directed to the cases page

Wallpaper name - pettyUniversity004

unpack-button.png

later-button.png

Unpack Model - (second)

After selecting the “unpack” button from the previous page you are then brought here which more so tells the user in the next step we will be declaring what we needed in that moment.

Name the Need button will take you to a page where you can select needs and enter your own and the data will be captured and added to your entry and then the entry will be closed

Wallpaper name - pettyUniversity004

Lets cut the noise. Strip away the petty details

Type: Space Mono Regular

Size: 16

what did you actually need?

Type: Space Mono Bold

Size: 16

Name the Need

Type: Space Mono Bold

Size - 12

name-the-need-button.png

The petty details are loud but the unmet need is real. Lets call it out

- ☐ Clear Boundaries
- ☐ Basic Respect
- ☐ Emotional Distance
- ☐ Space to be heard
- ☐ Validation
- ☐ A little Empathy
- ☐ An Actual Apology
- ☐ A Moment to Breathe
- ☐ Less Drama
- ☐ Snack and a nap

Other:

Type what you were actually needing here...

Lock In Need & Reframe

Unpack Model - (third)

After selecting the "Name the Need" button - you are then brought to this page that has a few ideas of things you can check, then these entries will be added.

You also have a box lower down where you can put your own entry.

All the data captured here will be added to the case, under the heading "I was needing" - as well as the case changing to being closed

lock-in-need-button.png

Unpack Model - (last)

After selecting the “Lock In Need & Reframe” button - you are then brought here. Which then prompts you regarding whether you want to take 2 minutes of mindfulness.

If you select “Let’s ground” - you are taken to the Mindfulness timer page - where there will be a live count down for 2 minutes

If you select “I’ll pass” - Then you will just be taken straight to the cases page and this case will now be closed with the new data captured

pass-button.png

timer-button.png

Mindfulness Timer

After selecting the "Lets Ground" button - you will be taken to this page - where you will get a live countdown from 2 minutes - once you reach zero the button will change to - "Reset Complete" - this will now become a selectable button where once selected you are taken to the cases page.

There is also a cross at the top for if you want to leave, and again you will be taken to the cases page

*A record of every time the noise tried to win
(and you unpacked it instead...hopefully)*

CLASSIFIED RECEIPTS

##CASE001 - *OPEN*

##CASE002 - *CLOSED*

Cases

This is the cases page. This is where all entries are saved.

Entry names will be done using an enum. Cases will be open if the reflection has not been done. Cases will be closed if reflections have been done. You are able to go into any entry. Open cases you will be able to add, save and then do the reflection. Closed cases are a read only view.

Menu on the side will give you these options

- Open Case
- Filter

Open case will take you to a new entry page

Filter will allow you to filter if you want all displayed or just open or just closed
